## Town Council In Parsimonious Mood

### Cannot Assist in Youth Training Movement; Will Take Title for Unredeemed Properties; Special Committee Will Adjust Hospital Claims; Will Take Assets of Sports Union And Arrange for Rink.

Following is a record of the proceedings of the council of the Town of Wainwright at its regular meeting in the council chamber on Tuesday, October 18th.

The members of council present at this meeting were Mayor Middlemass and Councillors Link, Lismore, Billing, Welch, Robinson and Cork.

The recorded proceedings of council at its regular meeting of October 4th, 1938, were read and, on motion by Councillor Robinson, were adopted and confirmed as written.

The reply of the superintendent of the Canadian National Railways to the letter of the Secretary, relative to the resolution of council at its previous regular meeting, was presented, to council and, on motion by Councillor Welch, was ordered filed.

A letter from the Secretary of the Municipal District of Gt. Edge requested the cleaning of the windows of the office of that municipal district and, on motion by Councillor Lismore, council authorized this work to be done.

Messrs. Speers, Ogilvie and Buckley, barristers, etc., Edmonton, wrote setting out the totals of certain accounts which they claim as owing by the Town of Wainwright to the Wainwright Municipal Hospital for hospital treatment to certain individuals, whom they claimed to be indigent, and on motion by Councillor Cork the Secretary-Treasurer was instructed to acknowledge the communication and to notify that firm of solicitors, without prejudice, that, contrary to their understanding, the accounts listed by them have at no time been rendered to the Town of Wainwright in detail and the Mayor was authorized to appoint a committee of council to interview the hospital board with the view of adjusting any past claims and a system of handling any claims in future. The Mayor then appointed Councillors Cork, Link, Robinson and Lismore as a committee thus authorized.

An account from the Wainwright Star relative to tenants application for voters' list, was presented to council and, on motion by Councillor Lismore, authorization for this account was required.

An account from Dr. Greenberg, for assistance to Dr. Wallace in connection with Wallace Murray, son of Mr. Harold Murray, was presented and, on motion by Councillor Robinson, the Secretary was instructed to notify Dr. Greenberg that council denies responsibility in connection with his account, as the father of this child is not indigent.

The account of the Province of Alberta for \$150.00 for scarifying and blade work on the streets was presented to council and, on motion by Councillor Robinson, the Mayor and Secretary-Treasurer were authorized and instructed to issue cheque in payment of this account to be included in the next financial report of the finance committee.

Mr. H. Abbott interviewed council in connection with the purchase of equipment to be used in the Dominion and Provincial Youth Training and, on motion by Councillor Link, it was unanimously resolved that council regret that it cannot provide funds at the present time for the purchase of equipment as the town's available cash reserve is depleted and it is not

advisable to obtain an overdraft for this purpose.

The Assessment and Property Committee presented a list of parcels of land which were offered for sale by public auction in July, 1937, under the Tax Recovery Act, and also a list of a number of parcels which had been offered for sale by public auction in former years under this Act, all of which parcels have not been redeemed since the time at which they were offered for sale, and on motion by Councillor Welch, the Secretary was instructed to notify the owners of the properties set out in the list that unless all arrears of taxes are paid on these properties before December 1st, 1938, council will take title for these properties without further notice.

On motion by Councillor Welch, Councillor Link was elected, Deputy Mayor for the next ensuing three months.

On motion by Councillor Link, Councillors Welch and Robinson were constituted a committee to arrange for a rink to be started and operated in the approaching season with full authority to act in this connection.

On motion by Councillor Welch, council authorized the taking over of the Union in connection with the lumber in the waiting room of the curling rink and belonging to the Sports Union, council to receive all cash on hand from the said Sports Union and to pay any outstanding accounts of the Union in connection with the lumber and posts to an amount approximating \$45.00, after application of the money on hand.

On motion, council was regularly adjourned.

## WEDDING BELLS

GOULD-WAHLSTROM

At the home of the bride's parents, Mr. and Mrs. Eric B. Wahlstrom, a quiet wedding was performed when their youngest daughter, Ethel, was united in marriage with James Alec, son of Mr. and Mrs. Oliver Gould, also of Wainwright.

Rev. T. E. Armstrong, B.D., of Wainwright, United Church, performed the ceremony, which took place at 3 o'clock Wednesday afternoon of last week.

Miss Daisy Gould, sister of the groom, and Mr. Carl Wahlstrom, brother of the bride, acted as witnesses.

A sumptuous supper was served at the close of the ceremony, and after a short honeymoon, the young couple will reside on the groom's farm in the Clear district.

## CUNNINGHAM-BOWLEY

On Saturday morning last the Rev. G. Magnus solemnized the marriage of Miss Grace Bowley to Mr. Robert Cunningham, both of whom are natives of the Clear district, the contracting parties being from Edgerton.

Following the ceremony, the happy couple left for Clive to visit with friends for their honeymoon before returning to reside at Edgerton.

## Car Accident On Fabyan Hill

On a return trip from the city on Saturday night last, Mr. and Mrs. J. McWilliams had a nasty experience when their car jumped the road and rolled over several times, coming to rest right side up in the ditch at the north side of the highway.

Happily neither of the passengers were seriously injured, although Mrs. McWilliams is suffering from some bad bruises, while "Joel" got a good shaking-up! The sticking of the brakes is thought to be the probable cause of the affair, which occurred just at the last turn on the steep hill coming east to the bridge.

## Annual Convention District Teachers

Wednesday and Thursday of next week will see the teachers of the Wainwright Insular district gathered for their seventeenth annual convention, the I.Q.O.F. hall being their meeting place.

The following is the official programme:

**WEDNESDAY**  
9:00—Registration.  
10:00—Invocation.  
Rev. P. Rickard, B.A.Sc., President's Address.  
Mr. G. C. Welch.

10:30—Annual General Meeting.  
**AFTERNOON SESSION**  
2:00—Music in the Elementary and Intermediate Schools.  
Mr. J. N. Engelson, Mus. B.Sc., Physical Education in the Schools.  
Wainwright Sub-local A.T.A.

**THURSDAY**  
9:00—Speech Training and Choral Recitation.  
10:30—Round Table Conference.  
Chauvin Sub-local.  
Grade 9 Examinations.  
**AFTERNOON SESSION**  
1:30—New Texts in the Elementary and Intermediate Schools.  
Irma Sub-local A.T.A.  
2:30—Entertainment Education.  
Edgerton Sub-local A.T.A.

**FEDERAL BY-ELECTIONS**  
ON NOVEMBER 14th

House of Commons vacancies in four constituencies—London, Waterloo South, Carleton and Brandon—will be filled by by-elections on November 14th.

The London seat will not be contested by the Liberal Party, it was indicated in a statement issued by the executive committee of the London Liberal Association on September 28th. Liberals will stand aside to facilitate election of Dr. R. J. Manion, national leader of the Conservative Party.

**NOTICE TO CURLEERS**  
A MEETING will be held in the Town Hall on Friday next, Nov. 4th, at EIGHT P.M., when all interested in this sport for the coming season are earnestly requested to attend.

By order,  
Secretary-Treasurer

**Armistice Day Commemoration Here**

Canada will join with the rest of the allied nations of the world war of 1914-1918 to pay tribute to the soldier dead, at 11 a.m. on November 11. Two minutes' silence will be observed, commencing at the hour the Armistice became effective.

His Honor Lt.-Gov. J. C. Bowen has received the following communication from the secretary of state at Ottawa:

"I have the honor to inform you that His Majesty the King has approved of arrangements whereby two minutes' silence will be observed through the British Commonwealth at 11 o'clock in the forenoon on Remembrance Day, November 11th, and accordingly Dominion, provincial and municipal authorities are asked to arrange for the suspension of all vehicular traffic during those two minutes. Your government is respectfully requested to make public His Majesty's approval of this arrangement."

**Rev. Father Hickey Is Transferred**

Rev. Father Hickey, who has been parish priest here for some months pending the return of Rev. Father Doyle, has been transferred to another parish, and a new priest is to be appointed for Wainwright district as the condition of Rev. Father Doyle's health is such that he will be unable to return to the West for some time.

Father Hickey will be missed by all as he has been greatly interested in training the young boys in hockey and the girls in basketball, as well as himself being a hockey player of no mean ability.

## WAINWRIGHT PRESBYTERY YOUNG PEOPLE'S RALLY

Arrangements have been made for a rally or convention of the young people of the Wainwright Presbytery of the United Church to be held in Irma on Nov. 3 and 4.

The Presbytery executive have been fortunate in securing the services of Rev. H. C. Burkholder, of Vancouver, as special guest speaker. Mr. Burkholder is the field secretary for young people's work for the provinces of Alberta and British Columbia. It is expected that a delegate to the Whitby conference this summer in Ontario will also be present to give a report of the activities at Whitby.

The low rates of single fare and one quarter for round trip will be available from Thursday, November 10, until 2 p.m. of Sunday, November 13, and will be good to return leaving the passenger's destination not later than midnight of Monday, November 14.

Where there is no train service on Thursday, tickets will be sold for trains on Wednesday, November 9th. Tickets will be good in coaches, also in sleeping and parlor cars on payment for the accommodation occupied.

**Special Fares for Remembrance Day**

Winnipeg, Man. — Remembrance Day holiday week-end which covers Friday, November 11, will be marked by the Canadian National Railways in a long week-end holiday bargain rate good between all points in Canada, according to word received from J. B. Parker, secretary of the Canadian Passenger Association.

**Replace Alberta Highway Bridges**

Greater safety is to be provided by the provincial public works department in the replacement of bridges in this province, according to information received by officials of the Alberta Motor Association.

On the Jasper highway, it is learned, the province proposes to replace all old bridges with new frame structures. A start has been made already in carrying out this policy.

At Falls, where a fatal accident occurred last August, resulting in the death of a woman and serious injuries to the two other occupants of the car which, after skidding in the gravel at the approach, crashed through the railing into a ravine 30 feet below, a new bridge is being erected.

Estimates prepared by the provincial legislature last spring provided \$35,000 for the construction of new bridges, while over \$200,000 was voted for bridge maintenance purposes.

Providing that weather conditions remain satisfactory, the public works department expects to have many of the bridges put in much safer condition for motor traffic purposes, thus reducing the accident toll in this province.

**Bobby Breen is Aid to Cupid**

An idyllic story by Bobby Breen playing the lead booked by the Elite Theatre Thursday, Friday and Saturday of this week. Backed up by such names as Marion Claire and Basil Rathbone, "Make a Wish" is certain to prove top-notch entertainment.

The simple story, by Gertrude Berg, opens with Chip, young son of a retired opera star, on vacation at a boys' camp, where he meets John Selden, composer, who is working on an opera. The two become friends and when the boy's mother comes to see the boy, the composer falls in love with her, building his opera around her voice and personality.

Considerable emphasis is placed upon the boy's camp activities, with the opera material taking on mounting importance at the finish. Mr. Rathbone plays the romantic composer.

Four of the five featured songs are by Ethel Merman, who lyricist Paul Webster and Louis Alter, the fifth being credited to these gentlemen exclusively.

While on the way to the city last week with three passengers in the car, Mr. Cecil Madder, of Fabyan, had the misfortune to run into a horse on the Cooking Lake trail, with the result that the car suffered \$150.00 damages. Fortunately no one was hurt.

## Fuel Oil Inquiry Is Now Deferred

**ARRANGING ANNUAL BUFFALO SLAUGHTER**

The annual slaughter of the extra buffalo in the National Park, which is expected to net the Federal government approximately \$40,000, will commence within the next few weeks.

The limited grazing area available necessitates this annual weeding out of the animals in the world's largest herd of these historic animals, and the contract for the meat and the hides of those which fall to the sharp-shooting of Sam Purcell, has been let to Messrs. Burns and Co., Limited.

Upwards of 2,000 will be taken from the herd of more than 6,000 in the park, and this will increase the grand total of animals slain in this way in the National Park to over 12,000 heads.

**Youth Training Stages Card Party**

An enjoyable evening was spent on Wednesday last, when a large crowd gathered for a card party sponsored by the Youth Training group of Wainwright, when 30 tables were in play.

The prizes for high scores at the evening went to: Ladies—Mrs. H. Pigeon, 1; Mrs. H. Schlitz, 2; Mrs. J. Alderman, Jr., 3. Gentlemen—J. Welch, 1; C. McBride, 2; S. Buhl, 3.

Miss E. Wright was the lucky ticket holder for the door prize, and table prizes were won by Mrs. Moore and Mrs. Steel.

Mr. H. Abbott, the local instructor in charge of the classes, gave a short address in connection with the movement, and lunch and dancing followed.

**CARD OF THANKS**

The Dominion-Provincial Youth Training group wish to take this opportunity of thanking all those who so kindly contributed in any way to make their recent entertainment such a success. The proceeds will be used for equipment for the group.

**Wm. Hetherington Dies in Hospital**

Following an operation for acute appendicitis at the Vermilion hospital on Friday last, Mr. William Hetherington, one of the old-time original settlers in the Burnhead district died on Monday morning last.

He was taken suddenly ill on Thursday night and rushed to the hospital, but despite everything that medical aid and care could do, he passed away as stated.

Order to arrangements for the funeral not being complete at time of going to press, a full report will appear next week.

**Naturalization Ritual Broadcast**

Ritual of a naturalization ceremony school room scenes showing what actual training in citizenship is being given to young Canadians, reconstruction of scenes from the Manitoba Legislature, are all combined in the episode of "Ventures in Citizenship" to be broadcast over the CBC national network tonight (Wednesday, October 26) at 9:00 p.m. EST.

**Notice to Subscribers**

A number of subscribers have paid their subscriptions during the past week and we would ask all on the list to look up their label and pay on account during the fall months.

For several years The Star was sent to a number of subscribers on credit and some of them have told us that it was the only newspaper they were able to read. For this reason, if for no other, this is a good reason to reciprocate as crops are good and there will be a return to all farmers of some kind.

If any subscriber is hard up he will have the opportunity to pay on installment.

Co-operation is the slogan this year as we have a number on the list who are in arrears, and who are now in a position to pay something on account.

The Royal Commission inquiring into the costs of fuel oil and gasoline in Alberta, has adjourned until December 5. It is endeavoring to consider the interests of operators, producers and retailers. The Commission includes Mr. Justice McGillivray and Mayor Lipsett of Ordley, Alberta, coal marketing expert. J. J. Frawley is crown counsel, assisted by Fred Cuttle, of the Alberta Gas and Oil Conservation Board.

In the early stages, Mr. Frawley stated his belief that excessive marketing costs rather than excess profits were responsible for high gas prices in Alberta.

It is proposed to investigate every angle of cost from the time the gas leaves the refinery till it reaches the consumer.

There seems, said Mr. Frawley, to be a duplication of services.

In the province of Alberta, there are 920 wholesale gasoline distributors. Of the total, 283 are controlled by the Imperial Oil Company, 209 by the British American Oil Company, 127 by the Great West Distributors, 85 by the North Star Oil Company, 96 by the Maple Leaf Petroleum Ltd., and the remainder by smaller companies.

With reference to gallonage distribution, it was stated that the Imperial Oil Co. Ltd., distributed 47.5 per cent of the total gas consumption of the province. This was done through their own marketing agency and other companies either subsidiary or holding jointing contracts. All the gas sold by Maple Leaf Petroleum Ltd., McCall Fretten Oil Co., Union Oil Co. of Canada and Canada Oil Co. Ltd. is bought from Imperial Oil company.

The B.A. Oil Co. is next in line with 27 per cent with its own marketing organization. It also supplies Great West Distributors Ltd. It controls 127 wholesale outlets.

"New Texas Co. of Canada Ltd., he said, markets 12.5 per cent of the total gallonage, practically all of which is imported from Montana.

Discussing the retail end, Mr. Frawley said there was 2,020 gas retailers and 80.15 per cent of them were supplied with gas by 12 companies. He said 54 per cent of the total gallonage was supplied by two major oil companies.

Dealing with price spread between wholesaler and retailer, it was said that the tank wagon price to service stations in Calgary was 18.5 cents per gallon. If the operator dealt exclusively with one company the price to him was 15.5 cents. In Calgary the spread between tank wagon and retail price was 3.5 cents and in cases where the service station was only paying 15.5 cents the spread was 4 cents. This spread varied in other parts of the province, being as high as 6.5 cents in Pincher Creek.

Dealing with sale of Ethyl gas Mr. Frawley said the Ethyl Corporation Ltd., controlled sale of tetra-ethyl lead used in manufacture.

Mr. Frawley explained that the tetra-ethyl lead cannot be used as tetra-ethyl lead issued by the company, which, in his opinion, constituted a measure of control over the gasoline industry in Alberta.

A. L. Smith, counsel for Alberta Petroleum Ass'n., H. G. Nolan for Imperial Oil; Eric Harvie for B.A., offered to do all in their power to facilitate the work of the commission.

A. L. Smith stated that the huge outlay in proving Turner Valley has not yet begun to be returned at all, and the history of costs of exploitation of Turner Valley would take some time to prepare.

Alberta was third among the provinces of Canada in gas consumption and he said, consuming 75,166,000 gallons in 1937 and 32,101,000 gallons in the first six months of 1938.

Alberta's crude oil price, on the field, is set by the Imperial Oil company, Mr. Frawley said. It is \$1.14 per barrel of 40 to 49.9 A.P.I. (American Petroleum Institute rating). Gravity of Turner Valley crude is 48.4 A.P.I.; the average field price is \$1.30 per barrel, as the value rises two cents for every full degree of A.P.I. rating.—Ex.

**House May Sit Before Christmas**

Ottawa.—The government is considering calling parliament before Christmas. Hon. Ernest Lapointe, minister of justice and acting prime minister, said last week after a cabinet meeting, so that it may pro- pogue before the visit of the King and Queen early next summer.

## Reducing the Elk In National Park

In order to keep down the numbers of the herd of elk in the National Park, a number of these animals are being slaughtered at this time.

As they cannot be herded into corals, owing to being so fleet of foot that a horse cannot overtake them, and being such experts at jumping fences, sharpshooters Sam Fawcett are shooting them on the range, and the animals are then hauled into the abattoir, where Butchers Gehring and Isted skin and prepare the carcasses. They handle from 25 to 30 each day.

Provided the weather is favorable for good fur, the annual buffalo kill will commence around the end of this month.

Miss Roscoe Callas spent a few days in the city last week.

## Chemistry's Remarkable Colloids

(Kenneth Andrews in Rockefeller Center Weekly)

A group of executives sat tense and silent in an office in the RCA Building in New York City. They stared with incredulous eyes at a purple on child. A short time before it had been rescued from a pile of debris, a withered, yellowed thing, dead. Now the petals were fresh and crisp, its colors vivid. It was blooming with new life, and would continue to do so for 16 or 17 days!

Dr. Frederick S. Macy, one of the country's outstanding bacteriologists,

had added a teaspoonful of an amber-tinted liquid to the quart of water in the bottle which held the flower. Here was striking indication of the mystery that he is ahead in that comparatively unexplored realm of science known as colloidal chemistry. It was one of the innumerable experiments these gentlemen had been witnessing for a year or more, on behalf of their internationally known pharmaceutical company. A few days later they signed an 18-year contract for the rights to a solution similar to the one in Dr. Macy's bottle. They will invest more than \$2,000,000 a year in it

from now on. To gain a working conception of what colloidal chemistry is, consider that living tissues and organs are simply great masses of cells—billions of them. The energy, the very life-force of these cells, is obtained from certain minerals and metals, among them iron, iodine, manganese, copper. There are some 33, with traces of 40, many others in the human body. Colloidal chemistry is the science which converts those elements into particles so minute that they can be utilized by living cells.

Normally, nature supplies the cells with these vital elements in their colloidal form. Science has now learned to produce these colloids in the laboratory. "Lately, life has been prolonged by colloid action," says Dr. Macy, "and better knowledge of the subject will certainly result in prolonging the normal term of existence." In the case of the apparently dead orchid, colloid in colloidal form was needed to restore the proper balance of the minerals and metals that comprised the life cells of the flower. Once that balance was restored, the cells began to function and the orchid lived again.

In the Colloidal Laboratories of America they have a motion picture which is as vivid as anything ever shown on a screen—a motion picture of the human body. The actors are the nerves in a human hand, magnified millions of times. You see the headcase. Those nerve endings are tangled, twisting, writhing. Then you see the colloid enter. These rescuers, smaller than the blood corpuscles themselves, march straight to the spot where there is an unbalance of the vital metals. You see those laboratory-prepared colloids restore normalcy there at the seat of the trouble. Then you see the nerves cease their twisting, relax, and assume their proper position.

Dr. Steinmetz, the wizard of electricity, devised a method of utilizing

colloids in the treatment of sinus troubles. The Bide-a-Wee Home, New York's famous hospital for cataracts and cataracts, can cure cataracts in three months, where it used to take three months. A large Midwestern city was freed from the scourge of gutter when colloidal iodine was added to the water supply. A famous institution for the treatment of alcoholism is experimenting with a colloidal solution which apparently not only overcomes effects of excessive drinking but removes the craving for liquor as well. Such treatment consists of the introduction of metals—gold and iodine, in the case of alcoholism—which correct the unbalance caused by alcoholic poisons.

The effect of colloids is explainable in part by electric action. Sick and dead and broken-down cells are attracted to the colloids by electro-magnetic force, as iron filings are attracted to a magnet. The colloids carry those decayed or poisonous substances into the blood stream and they are eliminated, the system meanwhile adapting what it needs of the colloids.

A simple illustration will suggest the immense powers that are being unleased. Suppose we have a cube of iron measuring an inch on each edge. The surface would be six square inches. The electrical charge is on the surface; therefore, the greater the surface the greater the charge; and if we divide the cube of iron into smaller pieces we increase the surface area. By colloidal chemistry the iron cube can be divided into particles so minute that they are invisible, hence instead of six square inches of surface emanating electric energy, we have something like 127 acres. In colloidal form iodine, for example, is one of the elements essential to the well-being of human cells. Yet if you should drink as much as two or three grains of free iodine, it would kill you.

## PICOBAC

PIPE TOBACCO  
FOR A MILD, COOL SMOKE

ain announcer that he play "The Butcher Boy" on his morning show. "And play it for my little brother," the lad wrote. "He cut his finger while listening to your program the other day."

Another fan forwarded this cheerful note: "I've been listening to your program every morning for 18 months, and I think you're terrific." The announcer, contending that every knock is a boost and that 18 months is a long time, answered thus: "Well, if I'm punk, at least I am subtle about it."

One oft-repeated radio yarn concerns a certain Salt Lake City actress. Her script required an emotional "shiver" at the appropriate moment, but instead of emoting the business, the actress read the line: "Oh, it's SO cold in here (SHIVER)"—and read the stage directions with plenty of feeling!

Instead of being embarrassed by mistakes, many a top-ranking radio star has capitalized on them. Jack Benny's cast make boners pay dividends. They don't try to cover up. Instead, they do their best to make it embarrassing for the fellow who makes the slip—funny for the audience watching the embarrassment.

As a matter of fact, the Benny crew, on and off the air, try to help each other get so used to being embarrassed that they can keep their wits about them when a tongue twister comes along. No one escapes his turn at being heckled—but they all enjoy being the butt of a gag as well as perpetrating it.

Don Wilson, for instance, is never allowed to forget his excess avoirdupois when he's around the studio, because every type of reducing gadget on the market is presented to him at some time or another by hecklers. Jack, himself, considers a day wasted if he hasn't managed to embarrass Mary before the studio audience by making pointed remarks about her new hat. The culprit who switched a box of blank shells on Phil Harris, making him miss the first bird shots at a shooting tourney, has never been discovered. But Maestro Harris strongly suspects it was a fellow Benny gagster.

When next you dial Benny's gang (Sundays, 5 p.m., C.J.C.B.) be on the listen for boners—and hear the laughs they get! Well, that about illustrates that it's human to err. Radio manufacturers, however, seem to have that in account in the 1938-39 sets. They have made them practically fool proof for the dialer. Says radio editor Will Whitmore:

"The new radio receivers for the 1938-39 season are marvels of mechanical ingenuity. About all one

## BEAUTY PROBLEMS

DISCUSSED BY  
Barbara Lynn

Eminent Beauty Authority and Adviser, who writes weekly articles on Beauty Problems for many Canadian News papers.

I make my bow to the readers of this paper with pleasure. My daily mailing already testifies to the tremendous interest in the subject of Beauty, and after all, who can be surprised at it?

Where is the girl or woman who doesn't wish to improve her appearance? Not all of us can achieve outstanding beauty, but we CAN make

the most of what we have. Care and regular attention to one's appearance will enable even the plainest woman to look nice.

What ARE the problems that worry most women in regard to beauty? There are no end to them, if my mailing is any criterion! Some of them, of course, recur far more often than others.

### Slimming

Obesity, for instance, seems to trouble a multitude of women. The demand for slimming guidance never falters. There are so many amateur slimming methods that it's no wonder women who are troubled with excess pounds get baffled and are eager to write to a beautician for some simple straight-forward advice.

Then there are those who whilst not corpulent, wish to reduce in part of their body—perhaps the hips, or the thighs, legs or arms.

Superficial hair is a very real blemish and a gnawing worry to those afflicted by it. Skin blemishes, wrinkles, hair troubles, undeveloped or sagging busts; I could go on recapitulating them indefinitely.

And how often do we read of Underweight? Not often, and yet it is a grave problem to quite a number of women.

In these weekly articles I shall take up the various beauty problems one by one.

### Write for Advice

Won't you please write and let me know how you like them? I never tire of receiving letters from readers. And don't hesitate to ask my help in your personal beauty problems.

Sometimes there are problems that are too intimate to be dealt with in newspaper articles, others that can be broached in only a general way. By writing to me you can be quite sure that your letter will be treated confidentially, and a personal reply sent you direct under plain cover if you enclose a 3c stamp.

The following special leaflets have been prepared and you may obtain any of them by sending a 3c stamp for each one required: How to Slim; Underweight; The Face and its Care; Superficial Hair; Reducing in Spots—Thighs, Legs, Hips, etc.; Hand Beauty; Bust Development; Caring for the Feet; Your Hair; Eye Beauty. These leaflets are up-to-the-minute and deal exhaustively with their subjects. When writing please mention name of this paper.

Address your letters to: Barbara Lynn, P.O. Box 75, Station B, Montreal, Que.

## The Family DOCTOR

Dr. JOHN JOSEPH GAINES, M.D., F.R.C.P.

OUR ELDERLY OFTEN GOOD TEACHERS

At this writing I have eight people under my care who are over eighty years of age—six men and two women. All but two of them are on foot; one woman has had a "stroke" but can get about and help herself. She is 85. The other is just past eighty, and has a sprained hip, using crutches to go about her house. One old man, 86, is a veteran of the civil war; another will be 88 at his next birthday.

It is interesting to watch these old boys and girls who have somehow come mighty close to living the right way, else they could not have achieved all these years with such success. I meet many of half their ages who really cannot learn more than they do.

And they know just a little more about what is good for them to eat than I do. I never put them on a diet except to ask them to eat what "agrees" with them. If I caught one old fellow eating salted peanuts and topping off with ice cream, I would not stop him. If one has diabetes, I do not by any means cut off a reasonable amount of sugar from his diet. I have always been a stickler for letting well enough alone.

One of them—just went out my door this morning—has a leg ulcer. I keep DRY dressings applied while it heals nicely. He laughs over the situation, not at all like a much younger man would do.

And, my old people are so appreciative; they make one love them. They have lived all these years, I have no doubt, on that very principle. The fellow who is eternally finding fault is in a poor way to live out a long and beautiful existence, because he burns up the good within him. We all may learn from this.

## WARFARE BY FIRE

J. Enrique Zanetti in The Independent Journal of Columbia University

The prediction has freely been made by chemical warfare sensationalists that the end of our civilization will come in a flood of gas. They would see the greater military justification, as well as historical precedent, if they would choose free as their obliterating agent. Indeed the one real danger, military experts agree, that large cities face in the next war is not poison gas but conflagration caused by incendiary bombs.

When the Armistice was signed the French found in German ammunition depots an enormous number of small aerial bombs weighing only about 2.5 lbs. Examination showed that they contained thermite, which would be ignited on striking and produce a small but intensely hot blaze. General Ludendorff's Memoirs published in 1919 explained that these small bombs were intended to set London and Paris on fire but were not ready for distribution until late in August, 1918, and by that time the German situation was so hopeless that the high command decided not to employ them. They figured that per terms would be made harder if the two capitals were in ruins.

The small size of these bombs may appear almost ridiculous, considering the tons of gas that are required to produce lethal concentrations, but here comes the essential difference between gas bombs and incendiary bombs that makes the latter far more dangerous to a large city. Gas dissipates while fire propagates. Each of these small bombs held within itself the devastating possibilities of Mrs. O'Leary's cow.

The thermite in these bombs is a mixture of iron ore and powdered aluminum or magnesium. When any part of the mixture is heated to a high temperature a violent reaction spreads rapidly through the entire mass, and the iron flows out as an incandescent liquid at a temperature of about 5400° F., far hotter than the molten iron that runs from blast furnaces. Curiously, this rapid and violent reaction is almost noiseless.

Such small incendiary bombs are particularly fitted to airplane raiding. They do not have to be aimed; they can be scattered over the general area attacked. A single two-ton bomber could carry nearly 2000 of them. In fact, a bomber is not needed; they could be dropped by any plane. War experience and recent maneuvers over large cities show that the attacking air force will always break through defenses to some extent. If only 100 two-ton planes broke through and only one effective hit was made out of 100 bombs, 200 fires would be started in a few minutes at widely separated points.

What 200 simultaneous fires would mean in a large city may be understood by considering that one single New York fire, at the Cunard pier in 1932, summoned one-fifth of the city's total fire apparatus and that with probably the best-trained fire department in the world this fire could not be confined to one pier.

The silence with which the thermite bomb does its work constitutes an added danger. After the noise of the original crash through the roof or skylight, which might well pass unnoticed in the turmoil of a raid, no explosion follows to attract attention. Hence scores of fires might gain a

considerable start before being discovered, and firemen maintain that at a fire "the first five minutes are worth the next five hours."

Aside from civilian demoralization and the suffering produced by a general conflagration, the destruction of railroad terminals, docks and warehouses would be a serious handicap to mobilization plans and the conduct of the war. This alone is sufficient incentive for a commander to employ thermite bombs in large quantities against enemy cities. And this may account for Europe's extreme caution recently in handling the most straitened international relations. Every European capital is within easy flying distance of the frontiers of a potential enemy, and might be wiped out by an incendiary raid.

In America the same danger may become threatening before very long. With the Pacific spanned and the Atlantic in process of being spanned by commercial planes, the protection of the ocean may soon be illusory. The greater the urban areas in which population and wealth are concentrated, goods and staples warehoused, the greater the risk of staggering losses by conflagration which no retaliatory devastation, no land or sea victories, no territorial acquisition, no financial indemnity can ever compensate.

There should be a healthy side to this realization that war is no longer to be confined to a struggle between troops. When it becomes generally known that all civilians would be in the midst of it even though hundreds of miles from the front, there will be less urge for nations to settle their difficulties by the insanity of armed conflict.

## The DIAL REVIEW

by Walter Dales

I have found out something about announcers something that sets them apart from other folks. They enjoy talking about their mistakes! Going into the matter, I discovered the reason. Usually, announcers' errors turn into good jokes—after the hot blush that follows them has waned away and after the sponsor's anger has been soothed!

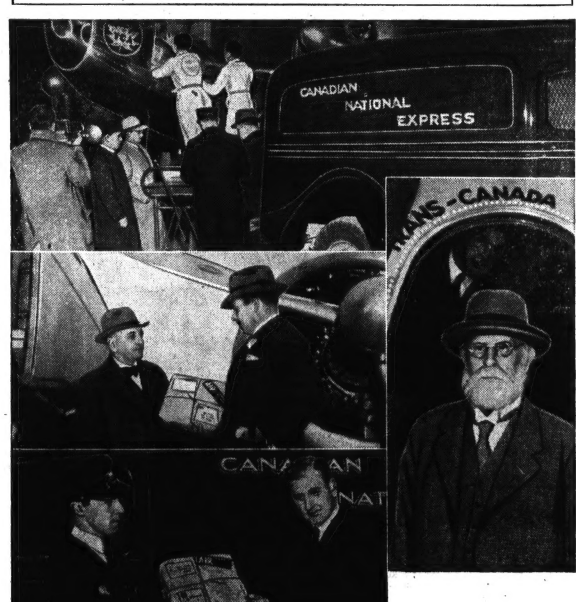

In a recent midnight gabfest C.J.C.A. announcer Norris Mackenzie started the ball rolling by recounting his prize boner, made during his first week at the microphone. Intending to say "The noonday show presents", Norris came forth with this amazing declaration: "The noonday show presents!"

That started things. Another spieler confessed his membership in the tongue-twister club through a slip in news broadcasting. Coming across the phrase "struck a man" he was amazed to hear "muck a strag" emanate from his vocal chords.

It was then disclosed that nearly all top-notchers, seasoned veterans of the airwaves, have their boners. David Ross, C.B.S. post announcer, once referred to musician Tito Guizar as "Tito Guilar and his singing Guizar". Graham McNamee, back in the days when he did announcing chores on Ed Wynn's program, once called gasoline, "gas-a-lon".

Equally embarrassing to announcers can be unintentional mis-wording of fan mail. For instance, a listener recently wrote in requesting of a cer-

## Canadian Commerce Takes To The Air

Inauguration of transcontinental air express, recently by Canadian National Express and Trans-Canada Air Lines marked an important step in Canada's commercial development. The establishment of this air service enabled interchange of commercial parcels between Vancouver and Montreal within twenty hours. Photographs taken on the opening day at four of the main points on the air route are shown. Top—Loads air express at Wainwright. Lower right—Sir William

Mulock, who witnessed the departure of the first air express plane from Malton airport, Toronto. Right—Five years ago Sir William saw the first train pull out of Toronto station. Centre—Major Adhemar Raynolds of Montreal, (right) delivers an Air Canada cheese to G. E. Bellenger, General Manager of Canadian National Express, to be air-expressed to Mayor George Miller, of Vancouver. Lower left—Mayor Miller receives the Montreal mayor's gift at Vancouver.

A cordial welcome is extended to All Members of the Degree when visiting in Town.

Mrs. Jean Billing, N.G.  
Mrs. M. Carsell, R.S.  
Miss V. Vail, F.S.MODERN  
WOMENCHARL ORMOND  
WILLIAMS  
President of National  
Federation of Business and  
Professional Women's Clubs, Inc.

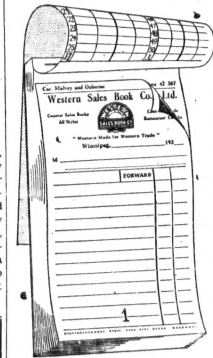

Crown Princess Juliana of Holland, recent bride of Prince Bernhard of Lippe-Biesterfeld, received a novel wedding gift from the women of Rotterdam. It is a carpet in the wearing of which women of all stations in life had a part. A committee took entire charge of the plan. When word of the proposed gift got about among the women of that city, many begged to help and finally it was decided to permit some to contribute foot cushions to match the carpet as there was not enough work on the carpet itself for all of them to do.

A document of special interest to women is that of Senate Document No. 319 recently printed. Dr. Emma Wolf prepared this material which is the first survey of the equality status of women in this country under the civil, political and industrial laws of the Federal Government. Also, of the states individually. It was done at the request of the Sixth International Congress of American States. From the survey one may see exactly where we stand in our struggle for equality before the law.

They have women acting as station masters in the Soviet Union. One of them, a member of the staff which is composed entirely of women, is Miss Claudia Mironova, who is considered an expert traffic manager.

New York State club women have been making a pilgrimage to the metropolitan city of their state just to visit points of interest and learn something about its art, its industry and its historic features. The pilgrims were led by Mrs. Perry V. Pennybacker, president of the Chautauque Women's Club of Chautauque, New York, which is affiliated with the General Federation of Women's Clubs.

Lillie S. Cutler of Lowell, Mass., is a radio public broadcaster and she says she finds the job intensely interesting.

## Our Farm News Letter

Contributed by

B. Leslie Enslie, C.D.A. (Glas.) F.C.S.

STABLED LIVESTOCK  
NEED SALT RATION

A reminder that livestock should not be denied a complete salt supply during the winter months is appropriate at this time. Practically all farmers make it part of their regular spring programme to put fifty-pound salt blocks out in the pastures for their grazing stock, but many of them fail to afford their stabled livestock a similar opportunity to gratify their full salt needs.

The need for salt continues all the year round and the livestock owner should not be denied free access to salt during the months when they are mostly confined in stables. The old method of providing an open salt supply was to place one or two fifty-pound salt blocks in the barn yard for use during the daily period outdoors, but a more satisfactory solution has been provided recently through the introduction of five-pound salt licks. Specially designed for individual use in stables, these five-pound licks enable each animal to have its individual salt supply from which it may judge its own needs.

Iodized salt licks of the same size and mineralized licks, containing supplementary calcium, phosphorus and iodine, afford an equally convenient method of counteracting in some measure the inadequate supplies of these essential minerals in the livestock ration. Another popular method of supplying minerals is to give soluble minerals, which contain 25 per cent salt, in the feed.

Winter life is hard on stabled livestock. Lack of sunshine and green feed increase their need for easily assimilable minerals, yet dry feeds are often short in those most necessary. Dairy cattle have the greatest mineral needs because they are normally under the double mineral strain of both lactation and pregnancy.

## IS STRIP FARMING

A SUCCESS?

The question often asked "Is strip farming a success?" should be answered in three parts: (1) Has it been helpful in controlling erosion? (2) Has it been adopted widely? (3) Has it created other serious difficulties for its use?

That strip farming has been decidedly helpful in soil drifting control is generally conceded, states A. E. Palmer, Senior Assistant, Dominion Experimental Station, Lethbridge, Alberta. Almost every farmer who has stripped his fields finds that with proper tillage practice he can hold his soil where he was unable to do so on large blocks of fallow. It can be said without hesitation that strip farming has definitely proved its value.

Strip farming has increased remarkably since a definite program was instituted by the Dominion Department of Agriculture under the Prairie Farm Rehabilitation Act in 1935 to test and demonstrate the value of strips in various parts of the prairie. Strip farming has been adopted on all of the 47 District Experiment Substations established under this act and farmers in the vicinity of these stations have noted the helpfulness of the practice and adopted strip farming. Several Agricultural Improvement Associations have made strip farming one of their major projects and in some instances have succeeded in getting most of their membership to follow only in strips.

Some difficulties have been encountered in adopting strip farming but most of the objections raised by those who have not tried the method are found to be of little importance in actual practice. A frequent difficulty encountered when first adopting strip farming is the tendency to consider strip farming as a complete cure for drifting and to disregard the necessity of careful cultural practices even where strips are used. Most farmers who have adopted strip farming have followed it for a few years as its most enthusiastic supporters. A real problem with strip farming has arisen however, in savely infested territory as this insect moves from the fallowed strips to the adjoining grain land.

ly. Before adopting strip farming where swiftness are prevalent it would be advisable to consult with the Dominion Entomological Branch regarding sawfly measures on stripped lands.

Where strip cropping is not practiced the wind sweep over large blocks of fallow may be broken by listing strips of furrows at intervals through the field. This modification of strip farming has proved very beneficial where fields had just started to drift and has been used to correct some bad situations. Where large blocks of fallow have been stripped by listing before drifting started, the danger has been greatly reduced.

## HEALTH

A HEALTH SERVICE OF  
THE CANADIAN MEDICAL  
ASSOCIATION AND LIFE  
INSURANCE COMPANIES  
IN CANADATHE STREET—A  
MODERN BATTLEFIELD

The street is a battlefield and thousands of our citizens are killed and maimed by incompetent, intoxicated and otherwise physically disqualified motor car drivers.

The drinking driver not apparently intoxicated is a present problem. Not always is the competent medical witness able to prove from the symptoms observed to the satisfaction of the court that the individual in question was unfit to drive an automobile. There are fortunately scientific measures which afford impartial data capable of including or excluding beyond any reasonable doubt the question of alcoholic intoxication. It will not be long before such means will be universally employed.

The smell of alcohol on the breath, drowsiness, motor or coma cannot safely be attributed to alcoholism for there is always the possibility of confusion and hemorrhage within the skull to be considered.

A British magistrate asks the question: "Are physicians positive that they can make an examination which will enable them to say beyond all reasonable doubt in all cases that the accused person is or is not to a serious extent affected by drink and that the real explanation of the symptoms is not to be found in some other condition?" The answer to this pertinent question is contained in the report of the Committee on the Driver of the National Safety Council (U.S.A.) which for the present has accepted 0.150 per cent blood alcohol as the level above which alcoholic intoxication is definite.

It can be determined by blood alcohol estimations or by similar urine examinations whether or not an individual has an abnormal amount of alcohol in his body fluids and tissues. The adverse effect of abnormal amounts of alcohol in the body has been demonstrated. It has been shown that the adverse effect of alcohol increases with greater concentrations of alcohol in the tissues. Any individual who is under the influence of alcohol, however slight it may be, is unfit to drive an automobile. The greater the degree of intoxication the greater the offense.

True no one can be compelled to subject himself to a medical examination but it is possible that the law can be amended to cover this defect.

## WENT TO BED

WITH BOOTS ON

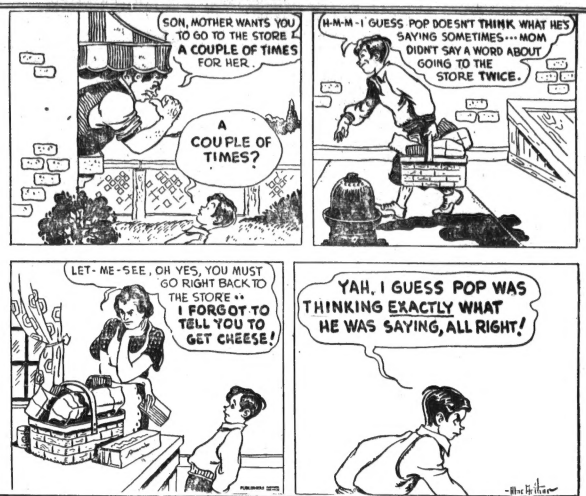

There has always been considerable controversy as to who built the first sleeping car. Records would seem to show that the first efforts were the adaptation of a day coach to sleeping car purposes in 1836 on the Cumberland Valley Railroad of Pennsylvania.

The first "Pullman" is said to have made its appearance in 1859. In the first make-shift sleeping cars, passengers went to bed fully clothed and reclined on rough mattresses with their own blankets or shawls drawn over them. In referring to the inaugural trip of the first "Pullman", the conductor, L. J. Barnes, said: "There was no crowd and the car, lighted by candles, moved away in solitary grandeur, if such it might be called. I remember the first night I had to request the passengers to take their boots off before they got into their berths. They wanted to keep them on—seemed afraid to take them off."

In Canada, the Grand Truck Railway, now part of the Canadian National System, gave early attention to the matter of sleeping cars. There was strong objection at first due to some unfavorable experiences on American lines but the matter was settled for the time by introducing bunks or benches running the whole length of the car and without any curtains or divisions. A rug and a small pillow were the only extras furnished. Today the modern all-steel sleeping cars on the Canadian National System is the last word in comfort, with air conditioning and other improvements.

## House of Hazards

By Mac. Arthur

## SPEED OF AIR

CRAFT LIMITED

If any aeronautical expert can demonstrate an aircraft which will better 650 miles an hour, A. E. Parker, contributor to Flight, the official organ of the Royal Aero Club, would like to meet him. The English writer claims no aircraft will ever be able to fly faster than the 650 mark and deduces the statement from an elaborate mathematical calculation, at the same time asking for opinions of other contributors.

He bases his calculation on the action of an airscrew on the air through which it propels the airplane. He argues that the pressure of the air in front of the airscrew is less than the normal atmospheric pressure, and hence that "an airplane as it flies is preceded by a wave of reduced pressure."

He then uses mathematics to prove that the maximum speed with which a wave of pressure can travel through air is the speed of a sound-wave, that is, 760 m.p.h. This, he says, is indicated as the absolute maximum speed of an air-screw-driven aircraft. The highest practical speed he rates much lower, from 600 to 650 m.p.h. The best form for a high-speed airplane, he says, would be a flying wing.

the engines "buried" in the wing.

If these calculations hold good, then the time when the airplane will have reached the limit of its speed may not be far off. The world's airplane record, set up by Italian Lieutenant Francesco Agello in 1934, is 440.29 miles an hour. It is probable that this could be surpassed by a specially-built racing plane today.

Fastest transport aircraft in use today are the Lockheed 14's, to which numerous of the European and British air lines are turning for long hops where speed and safety are first considerations. Howard Hughes chose one for his record globe-gliding flight earlier this year, and Canadians are proud possessors of 10 of these luxurious passenger monoplanes. Cruising easily at 200 miles an hour the silver-winged machines of Trans-Canada Air Lines daily span the continent from Vancouver to Montreal, their large compartments containing express and mail, and covering the long stretch from the Pacific to the Atlantic in less than 20 hours.

Having stopped home work in elementary schools, Hove, England, is encouraging the children to take up useful hobbies, such as carpentry, painting, needlework and reading.

**TEN YEARS AGO**  
Mr. Jack Cruise moved to town last week with his family and has taken up residence in the Dave Credille house on Main Street. This building was recently enlarged and remodelled.  
Mr. W. LaFrance was unfortunate in losing a large stack of green feed by fire last week.  
Mrs. Geo. Cheternan was brought into hospital, where she is receiving medical treatments.  
It has been announced that the Town Fathers have decided to run the skating rink themselves this winter and are hiring a caretaker to look after things for them.  
The L. Watkins property on Third avenue passed into the possession of the Wainwell Oils during the past week and Mr. Len Horton has been busily engaged moving the building to their camp site west of town.  
Mr. Ed Ganderton purchased the Russell property on Queen's street and made arrangements to move his family there.

The new car and truck garage which is being built on Third avenue by Bill Bibby is nearing completion rapidly.  
**TWENTY YEARS AGO**  
It was announced that the local stores would close at 5 o'clock and not open until nine in the mornings. This move was made to allow clerks in the stores to obtain more fresh air, after wearing masks all day, it was necessary for them to obtain a complete change of atmosphere if they were to ward off the prevalent Spanish influenza.  
The Spanish influenza epidemic is reported to be well under control in town. Mrs. Bowerman is recovering from her attack and Mr. D. O. Brown is out of danger. Mr. Roberts, the mail clerk at the G.T.P. office, however, is in a very serious condition.  
Mr. Jack Veltch accepted a position in the grocery department of the A. C. Armstrong store during the past week.  
Mrs. Hilla Johnson and her mother.

**EDGERTON**  
We are indeed pleased to be able to report that Rev. A. Love, who was on the sick list last week end, is now considerably improved and he hopes to be well enough to conduct his regular services next Sunday.  
Congratulations to Mr. and Mrs. Calvin Archer on the birth of a son and heir. Good things, like bad, come in bunches it seems, for Calvin has harvested a wonderful crop this year, almost 10,000 bushels, and that sounds mighty good. Baby won't lack shoes or anything this year at any rate.  
Harmon Lewis, the affable and obliging young clerk who has dispensed groceries for so many years at the Co-op store, has left to take up duties of a similar nature at Metlakw. We understand that it is a boost for him, and although his cheery smile will be sadly missed by many, all who know him wish him every possible success in his new venture.  
Several Chauvinists visited our village on Saturday evening last to see the show, "King Solomon's Mines". Those who talked to thought it was a most wonderful production, and we agree. A brand new Buick outside the Mitchell home indicates who one of the visitors was. Isn't love just grand, Gilt?  
Mrs. Ronnie Pawsey spent the week end with Mr. and Mrs. P. S. Pawsey, which reminds us that Johnny Moore, who has been at the Red and White Store for several months, has departed hence. Rumor has it that he has been offered a full time theatre job, so who can blame him if he prefers operating a movie machine all the time instead of twice a week which he did here.  
A little birdie twittered in our ear that Chas. Spornitz, who went away last week single, will shortly return a benedict.  
And talking of newlyweds, we understand that the bridegroom of last week, Raymond Ayres, is to step into the vacancy created at the Co-op Store by the departure of Harmon Lewis.  
George Sawyer invited our worthy postmaster to go to Edmonton last Thursday for the annual Chevrolet show and banquet for dealers. They returned Friday afternoon and whilst they are much about prices they have nothing but glowing praise for the 1939 "models", it seems that some have exceptionally fine "knee action". As for the banquet, well it positively beggars description even now. It must have been good.  
Got your storm windows on, folks? No! neither have I and something (I wonder what) is urging me to get busy at the pesky job before Old Man Winter makes good his threat of the last few days, so—here I go, so long!

**North Edgerton**  
A regular meeting of the board of trustees of Empire lately resulted in Mr. L. Oxy being the chosen delegate to meet a representative of the Alberta government on the matter of Alberta schools being disintegrated. The convention will be held in Blooming Valley School on November 3rd.  
A petition for herd law in Division 3 of Morton municipality is being circulated this fall, quite a few having signed the paper, whilst a great number are against it. Herd law is a great thing for the farmer with ample land, but the small farmer, with pasture scarce, especially when he depends on a few cows to give the necessities of life, is going to have a hard row to hoe should herd law come into effect. Stock does not ramble on these roads in the summer time but spends the time on the river bottoms where there are no cars but lots to eat and drink. Relief costs in Alberta will only be raised higher if the farmer has to comply with a herd law rule. Another item of notice is the fact that roads which are let grow to weeds and long grass are almost impassable in winter time when the snow is here, hard for any maverick to get through.  
The mole, that small animal which some claim is blind, we notice has been gotten rid of. Evergreens seem to be the only trees safe from the mole. Each year a bounty is placed on the heads of crows and magpies, but if the mole is not also put on this

er left on Tuesday evening for Lacombe. Mrs. Johnson is much improved in health.  
Mrs. Russell Smith left on Sunday for Edmonton to join her husband who is employed with the G.T.P. at that point. They plan to make their future home in Edmonton.  
Mrs. Eva Benoit Touchette of Heath, passed away on October 31st at the age of 32 years, as a result of influenza.  
Mr. H. G. Thunell, editor of The Viking News, left on Monday for Toronto to take a course with the Royal Flying Corps.  
Miss Eva Johnson, teacher at Education Point, passed away in Irma from an attack of influenza. She was 22 years old.  
Mrs. O. J. Elder and infant daughter, arrived home during the past week from Edmonton.  
Basil Bryce, aged 15 years, son of Mr. Alec Bryce, formerly of Wainwright, was a victim of the prevalent influenza.  
**HEATH**  
Heath school is being stuccoed during the fine weather.  
Local Liberals held a political meeting at Arm Lake school on Saturday afternoon.  
Mr. and Mrs. Arthur Watson and Mrs. Watson, sr., of Arthand, visited relatives in the district on Sunday.  
Miss Beryl Jackson was the guest of Alma Potvin for a few days.  
Heath school pupils and younger brothers and sisters had a Halloween party at the school on Friday afternoon.  
The presidents of the local Mutual Telephone Companies east of town met on Friday at the Alberta Government Telephone office and formed a holding company, taking over the main circuit supplying the nine respective lines. The new company will be the Lake District Mutual Telephone Company, with Mr. Baker as president and Mr. Mockford as secretary-treasurer.  
**SYDENHAM**  
Mr. George Glenn returned to his home last week after spending the past summer away at work.  
Mr. and Mrs. Ted Giddard, from Gilt Edge, were visiting on Sunday at the home of the latter's parents.  
Mrs. O. Croteau was an overnight guest on Thursday at the home of Mrs. J. Bamelis.  
Little John McKay spent the week on the farm, visiting at the home of his relatives.  
Mr. F. Seabrook was among those who attended the banquet for the "South African Veterans" on Friday evening.  
With threshing all done and the feed stacked, the farmers are all busy with their odd jobs which must be accomplished before winter sets in.

**Coming Sales**  
The following sales by Auctioneers Stuart and Bowerman are drawn to the attention of our readers:—  
On the farm of Mrs. J. St. Peter, 5 miles North of Wainwright, on Wednesday, November 2nd.  
On the farm of G. Griffiths, 12 miles north of Irma on Thursday, Nov. 3rd.  
On the farm of Jules R. Bamelis, 8 miles north and 2 miles west of Wainwright on Tuesday, November 8th.

bounty scheme I am afraid Alberta, which looks so bright amid its beauty of poplars, etc., will someday look like the Sahara desert. Now is the time to act; rid the country of these rodents.  
Still we notice the many farmers tilling their lands with teams and tractors. This has been an excellent fall and should be an extra saving next year should there be a late spring.  
All those people who got married hurriedly in the middle of the European crisis may yet regret flying to arms.  
We are not quite sure yet, but we don't think Christmas is so far away, judging by the carols of the tiny tots who are busy rehearsing their pieces for the coming concerts.  
Last Wednesday night was rather warm for this time of the year and Thursday morning quite balmy, so when it started into a drizzling rain most everyone looked for snow and a quick freeze-up but after about an hour's rain cut came the sun in all its glory. We don't mind being fooled this way.  
The bridge game, a pleasant game of cards in the winter months, is once again beginning to make its appearance. We understand the different players and "experts" are already forming groups of people into clubs.  
Buchanan Brothers drove to Edmonton on Saturday to see the practice game between the two N.H.L. New York teams. Well worth seeing.

**HOPE VALLEY**  
Well, here we are again with a fresh batch of Hope Valley notes. There has been lots of news to write about during the past few months but your correspondent seems to have cast aside his pen in favor of a pitchfork so we are taking his pen into our unworthy hands that the history of Hope Valley may be preserved for posterity.  
Hope Valley Local of the Junior U.F.A. held their first meeting of the season October 24th and a busy time was spent planning the winter programme. We cannot tell you all the pleasant surprises the juniors have in store for the district but we will say they are full of pep and determined to make this winter one which will long be remembered. The first event on the programme is a big Armistice Dance to be held at Gilt School on November 11. We are told that this dance is to be even better than the average junior dance, so don't forget to be there. The next meeting of the juniors will be November 9th. All young people in the district are welcome and if they take our advice they will be there. We know the junior meetings are always worth attending.  
We understand the local branch of the Communist Party is sponsoring a series of educational talks this winter to be given at their regular meetings, which are held at Gilt School every first and third Wednesday of the month. That sounds interesting so we will be there to let you know what it's all about.  
Most of Hope Valley went to Rosedale on October 21 to help celebrate Mr. and Mrs. Dolph Teasdale's wedding dance. Most everyone else with in 50 miles of Rosedale seemed to have done the same thing but despite the huge crowd a good time was had by all. We are quite sure that everyone in Hope Valley joins us in wishing Gwen and Dolph many years of happiness.  
We would like to know who the four young gentlemen were who made the special trip to Edgerton the night of the wedding dance. We would also like to know if they felt any better when they returned to the hall.

Well, that's all for today but we will be back again with some more news from the best district in Alberta next week. We will be seen 'yuh then.

**HOW TO GREASE YOUR OWN CAR**  
FIRST—Put on your dirtiest clothes as you can crawl under your car.  
SECOND—Buy a supply of transmission, differential, universal joint, water pump and pressure gun greases, a grease gun, and a spray gun. Also some penetrating oil and No. 40 oil.  
THIRD—Equip yourself with a lot of good strong words such as "Damn", "Oh, Hang", to use on the joints where the grease doesn't want to come through. Keep using these words until the grease comes out the other side.  
FOURTH—Buy yourself a complete set of wrenches to use on the containers that must be opened to inspect the lubricating supply inside. Also some new skin to graft on your knuckles when the wrench slips.  
FIFTH—Fill your spray gun full of penetrating oil to spray on the springs. Be sure not to breathe for about ten minutes while spraying the springs or you may oil plate the insides of your lungs, which is bad.  
SIXTH—Be sure not to miss any place that should be lubricated as it may cost you the price of twenty grease jobs for repairs.  
OR—If this seems like too much trouble and expense, drive your car into our Garage and just ask for a Lubrication Job. High-pressure guns assure you of complete greasing service.  
AND—Mechanic Roy Donnelly can sure fix you up; no matter what trouble your car seems to give!

## The World of Wheat

H. G. L. Strange,  
Director, Research Department,  
Searle Grain Company, Ltd.

"I don't believe this Thatcher will stand up." In a few years the rust will get it."

"Why do you think that?" I said to my friend John Skeptic.

"Well," he said, "Ceres was boosted to the skies to resist rust, and you will remember that after a few years it had no more rust resistance than Marquis, so I guess Thatcher will go the same way."

"For my part, John," I said, "I think you're badly mistaken. In the first place Ceres was not bred as a rust-resistant wheat, and it never had been tested by the plant breeders against rust. It simply had been found, under several very mild rust epidemics, to have a little better resistance than Marquis."

"Thatcher, on the other hand, is an entirely different thing. It was bred by some of the ablest plant breeders in the world, specifically to resist wheat stem rust. It was tested in a most rigorous way for years in the laboratories against all the forms of rust that are known and on the farms it was not harmed by the very severe stem rust epidemics of 1935 and of this last year."

"Plant breeders all say they will be greatly surprised if Thatcher is ever damaged by the present forms of wheat stem rust."

Following factors have tended to raise prices:—Australian outlook becomes more serious owing to hot winds; complaints of deterioration increase—Some talk of further inflation of money by U.S.A.—India buys more Australian wheat—Some frost reported in Argentina—Possibilities of broad and active demand for barley in Europe.

Following factors have tended to lower prices:—European rye harvest largest since 1933—Excessive surpluses of wheat, corn and rice in the U.S.—Australia ships corn to Canada—France sells wheat to Italy on barter basis—Due to record wheat crop all grain or flour imported into Finland must contain a domestic mixture—Manchurian soybean supply above last year.

## The Ottawa Listening Post

Mr. Dunning is back—but Ottawa circles are asking how far back.

The Finance Minister looks the picture of health. His smile is broad, his handshake firm and he announces that he is taking over his duties "soon".

But the question raised behind the scenes is: Will Mr. Dunning be able to stand the grind of a long, hard session which is now slated to start in December? Even more pertinent, perhaps, will his health allow him to tackle an election campaign next fall?

These questions are being discussed not only in Ottawa but by Canadian business men all through the country. Mr. Dunning's record with the most difficult portfolio in the Canadian government may not be a perfect one. He has left undone some things which he ought to have done. He may conceivably have done in a few cases those things which he ought not to have done—to wit, such a political heel of Achilles as loans to municipalities for "self-liquidating" purposes. But he has been sane when others in the country have been driven by depression-born exasperation to wild and dangerous experiment.

Business interests see in Mr. Dunning a safe bulwark against attacks on the status quo of the financial system, whatever it may be worth to the future of the national economy.

Mr. Dunning's collapse last session was a severe blow to the business interests of eastern Canada at least. His return has revived hope. And this hope goes further than the immediate prospect of having a safe hand on the helm of finance.

When Mr. Dunning left Ottawa earlier in the year there was no question of the severity of his condition. But as soon as he had passed the more critical stage there were those—and may your reporter pause here to disassociate himself from the group—who whispered that Mr. Dunning was the victim of one of those incurable political illnesses which sometimes visit politicians from the arena of public life at the psychological moment. Mr. Dunning's return has given the lie to his uncharitable critics.

And it has again brought into the forefront the King-Dunning-Gardiner triangle which has led political gossip with ammunition for nearly two years.

The retirement of Prime Minister Mackenzie King is an inevitable background to all federal political forecasts though it seems likely now that the veteran of the east block will fight one more election before he leaves public life. When the time comes his mantle, it is generally expected, will fall on one of two men, his Minister of Finance or his Minister of Agriculture.

Mr. Gardiner's conquest of Western Canada, Ottawa believes, has met with a good deal of success. He has worked on fertile soil, where already, the seed of discontent with Mr. Dunning, their former champion, had been sown. On the other hand, the

Finance Minister has strong support in Eastern Canada and may be expected to go places if—and it is a big if—his health will allow him.

The almost definite announcement from Hon. Ernest Lapointe this week that Parliament would be convened before Christmas has started the usual run of pre-seasonal forecasting. Uppermost in the minds of infallible prognosticators, whose batting average is generally around 10%, is the fact that this is almost certain to be a pre-election session.

Perhaps it is only this fact which is inspiring whispers of a change—presumably downward—of that vote-depleting miasma. There would seem to be little else to justify a prediction of lower taxation. Somebody—and the taxpayers for the present anyway must remain the goat—will have to shoulder another heavy railway deficit. Last year's C.N.R. deficit topped the \$48,000,000 mark. This year, it is estimated that it will be somewhere between \$50,000,000 and \$60,000,000.

The senate railway committee will probably resume its meeting soon after the beginning of the year to consider its report on the mass of evidence heard last session. When it adjourned in the early summer without making the report the general feeling was that the railway issue was again buried. A grain crop was in prospect. Business was showing signs of improvement. It looked as though improvement in rail earnings might be conducive to another period of laissez faire. But that improvement has not come. The C.N.R. deficit will be larger. The C.P.R. will only just hold its own. If reports of earnings in the last two months are correct. That railway committee report, innocuous as it is likely to be, will be watched with a good deal of interest.

There is no \$2,000,000 expenditure which is likely to come under closer scrutiny by members of the opposition than the government's loans to municipalities for self-liquidating purposes. These loans to date total some \$2,100,000. With one exception, Fredericton, N.B., they have all been placed in Western Canada. Vancouver, Edmonton, Regina, Lethbridge, Medicine Hat, Calgary, Prince Albert and Moose Jaw are all beneficiaries. A good many of the loans approved have been for water systems, some are for paving. Two others are for airport buildings, another for an electric substation. Snap judgments, however, should not condemn government policies. The idea behind self-liquidating loans which are backed for whatever it is worth by the guarantee of the province is a good one. It holds possibilities of putting a large sum to work for the relief of unemployment. Its weakness lies in the fact that it also creates a tempting pork barrel for the politician.

## SLAT'S DIARY

Sunday: Jake was in S. S. this a.m. the last time for several Sundays & kept marking on a piece of paper. The teacher ast him what he was doing & he said he was drawing a pitcher of God. The teacher said he boddie knows how God looks like & Jake said Well they will when he gets this pitcher drawn.

Monday: Don't know for sure whether I will marry Jane or not. Her Pa has sent got much money & I herd a man say its just as easy to love a rich girl as a poor 1. But finding a rich girl as purty and sweet as Jane isent going to be no easy thing to do I expect.

Tuesday: Ma sed to Unkel Hen do he bleeve clubs is good for wimmen. He studied a litle and then replide yes if nothing elts will make them be good. Ma lookt like she were sorrie she ast him.

Wednesday: Blisters called on Elsy last evening. He sed he kist her & sed to her that i 1 in a 100 & he sed she replide that she thot he had got what he could figure arithmatick up in the thousands. He sed he took that as a hint & i sure was he found out.

Thursday: I ast Pa whate the differents between a school teacher & a eddior. He thot a secud & replide Both are gotta be teachers but i has to be abel to tell what she knows & i has to be abel to tell what he dosent know & the teacher tells it to kids that dont know & the eddior to grown-ups that dos know. Pa sed he thot teaching the easesest to get away with. So do i.

Friday: After school this p.m. I & Jake & Blisters & are skates went down to the pond. Jake & Blisters ast brave like me & sed they didnt bleeve it wood hold up. I thot it wood & went out on the ice. They was right & had to hand me out the end of a old flashen pole to get me out. When I got home my cioss sounded like tree lins in a wind sleet storm. But i sint got newmoy yet.

Saturday: We sneaked back to the pond & was carefull & it was okay doks this time. But whair I fell threw lookt like a tragedy have occured to somebodie. It has tot me to not be in a 2 big a hunk grabbing at every thing that looks good. For as Napoleon sed evry rose consels a bribe & etc.

Order your private greeting Christmas cards NOW. Samples on display at The Star Office.

Richard Connors, a pipe smoker since eight years old, died in his 105th year at his home at Stinfild, near Oshawa.

## Nancy Hart's HOME NEWS

Blackheads and enlarged pores should never be tolerated. A good complexion brush, bland soap and water will soon cause them to lose their stubbornness. Hot compress applications help to soften the skin and stimulate the circulation. Then cover the finger tips with tissues and press gently, being careful not to bruise or break the skin. Follow with iced witch hazel or other astringent skin tonic.

Probably the monarch of all salads is a calavo half shell, filled with juicy sections of grapefruit over which has been poured a judicious amount of tart, thin, French dressing. A few slices of green olives give an unusual flavor.

Navy blue has been picked as the leader of the spring color brigade with several bright blue tones in the vanguard flanked by black, grey and beige. Of course, footwear will continue to be closely linked with costume ensembles but the one-color ensemble is out. If the shoes match the dress, coat, or hat, accessory colors should contrast.

Here is the recipe for an Egg Shampoo given to us by a famous movie star noted for her luxuriantly soft and beautiful hair. Use it as you do any shampoo:  
2 well-beaten eggs  
2 drops of ammonia  
1/4 teaspoonful of borax  
1 pint of water

Book of the Week: "The Return to Religion" by Henry C. Link Ph.D. An outstanding book on practical psychology, poise, and personality development. "I have advised hundreds of people in their quest for happiness to use their heads less and their feet more," says Dr. Link. And the result is "a return to religion."

## NEWS & VIEWS OF TOWN AND DISTRICT

We are glad to learn that Mr. R. W. Campbell, who has been sick for some time, is improving at his home east of town.

The farm of Mr. Wm. Sherbini at Gilt Edge is being improved by the erection of a new barn during the past few days.

Mr. Fred Ford has purchased a new G.M. half-ton truck during the past few days.

Following a few days of dreary weather, the first winter snow arrived on Monday evening, and as we write it will probably be followed by more—much more.

The trying weather for the past week has seen quite an increase in the number of cases of sickness and colds around the district.

Mr. H. Dunning and family have now moved to their new home at the coast, and we understand that Mr. Clarence Patterson is to move into his house for the winter.

Somebody's home burns down every ten minutes in Canada and the U.S. When your turn comes (if ever) be sure it is well insured. Better see Joe Welch today; it will pay you to be safe.

We are informed that Mrs. Frank Stronach and her son, James, are planning to move into town for the winter months.

Wishing to move to Chilliwack, B.C., for the benefit of his health, Mr. Jules Hamell is holding an auction sale of his effects on Tuesday next.

Both Douglas and Beattie Wallace were down from varsity in the city for the week end.

We understand that Mrs. W. Blason who was recently operated on in the city, is getting along nicely and expects to return home shortly.

The Bill McKay house on Queen Street has been rented for the winter to Mr. A. Hutchison, of the Vaness district.

### COMING EVENTS

The C.W.L. will hold their big annual Whist Drive and Dance in the Separate school hall on Thursday, November 3rd, commencing at 8.15 p.m. Everybody welcome. Good prizes and lunch. Admission 35 cents. 2-11

The Ladies' Aid of St. Andrew's (Pres.) church will hold their annual Christmas bazaar in the L.O.O.F. hall on Saturday, Nov. 19th, starting at 2.30 p.m. Fancy and useful articles will be on sale at prices not exceeding one dollar. Everybody welcome; afternoon tea will be served.

St. Thomas' (Ang.) church W.A. will hold their annual sale of work and afternoon tea in the Oddfellows Hall on Saturday, November 26th, at 3 o'clock.

### NOTICE

Mrs. M. A. Perras wishes to inform her former customers that all outstanding accounts are now payable to her at her residence on Fourth Avenue East instead of E. Gehring. 2-11

Mr. Alton Lewis is building an addition to his farm home north of Fabyan.

Mr. Wm. Dalton, of Fabyan, is a patient at the local hospital these days.

Winter is sometimes tardy, but it always comes; and you always need good coal such as we have on hand at all times in the Atlas yard. Take home a load while the roads are good. Joe Welch, mgr. 2-11

The youngsters were out in full force over the week end to celebrate Halloween. On Sunday night some of them caused quite a lot of annoyance through well-scooped windows, while on Monday evening several ash cans, gates, etc., were given attention. The wee kiddies did quite a business of gathering goodies; too, although these gangs included gatherers from five to fifty years of age.

Mr. Henry Tondy, of Gilt Edge, is visiting friends in the St. Paul district for a holiday.

The annual card party and dance of the C.W.L. is being held in the auditorium tomorrow (Thursday) evening, when a big attendance is hoped for.

## The Legion Notice Board

SATURDAY, NOV. 5th, POPPY DAY

Monday, Nov. 7th—Regular Monthly Executive Meeting.

FRIDAY, NOV. 11th.—REMEMBRANCE DAY. Ex-service men are asked to parade at the Town Hall at 10.45 a.m. Medals and decorations to be worn. 11 a.m. Two minutes' silence at the Memorial Clock Tower and the laying of wreaths in memory of fallen comrades, followed by service in the theatre at which the Provincial Chaplain to the Legion, Rev. W. T. H. Cripps, will be the guest speaker.

SHOW, SUPPER AND DANCE at night. Tea pretty girls, a spectacular dance number; Soldiers' Three—specially written for the occasion and never before performed anywhere. The Egg—a musical melodrama tragic in its intensity. Songs, dances and original numbers. GOD SAVE THE KING

### FOR SALE

Here's a good buy in a small "Cat" Tractor. Enquire about this at once; the price is truly RIGHT! See

MRS. W. S. GOULET,

Town.

Or E. Heffernan at Footroom

The buffalo kill at Elk Island park is dated to commence on Nov. 10th, according to news received.

From some entirely unknown cause fire started last week in the Washburn cottage at Clear Lake, but very fortunately smothered itself out, after quite a bit of damage had been done to the flooring and a partition.

The deeper a mine is the harder and hotter the coal is. Jasper hard coal is mined in the mountains near Jasper Park and is similar to Pennsylvania hard coal sold in Eastern Canada at \$15 per ton. It makes an excellent kitchen coal as it runs from egg size to lumps which are suitable for furnace or heater. To introduce this coal we are selling it at \$7.50 per ton, which is the best value ever sold here. Atlas Lumber Co., Joe Welch.

Mrs. T. Daniels is still in Edmonton, where her son is in hospital for specialist treatment.

A nice crowd gathered at the theatre on Monday night for the annual Halloween dance and the merriest was kept going all quite a late hour. Mrs. Bob Lewis was the fortunate winner of the door prize.

Mr. Steve Phillips, of the Calgary Power Co., was in town over the week end.

Miss Donna Fraser was a tripper to the city over the week end.

Dr. H. Wallace has been enjoying a short visit from his sister and her husband for a day or so during the past week.

Mr. and Mrs. Alex Wilkie gave all the youngsters attending the Trafalgar school a treat at a Halloween party at their home on Monday evening last.

Mrs. Tansley was down from Edmonton last week on a short visit to relatives here.

We learn that Bill Bibby, who has the contract for shipping of the meat and hides from the annual kill in the National Park, shipped the first carload of elk on Monday last.

Mr. and Mrs. Fred Perkins were trippers to Edmonton for a day or two last week.

Owing to Rev. T. E. Armstrong being absent at Kinross on Sunday last, the United church service was conducted by Rev. E. Longmire, of Irma.

Mr. Nelson Hubbard was down from the city last week end to visit friends here.
